Experience Your Business in Software

DIGITAL TRANSFORMATION OF
CONSTRUCTION BUSINESS

Contracting Simplified with In4Suite®

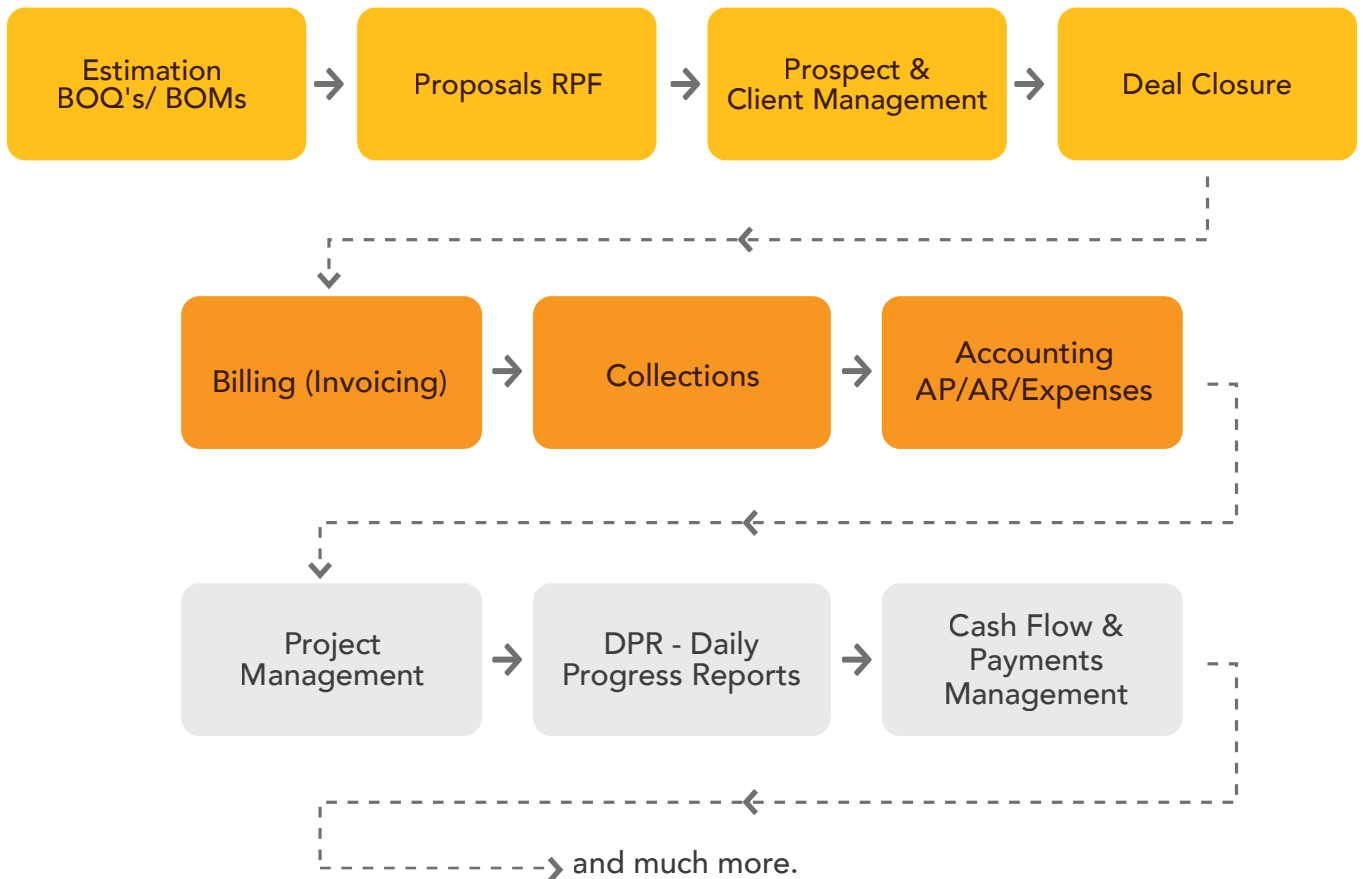

In4Suite® is built around the premise that connecting the **BUY** side, **SELL** side and **IN** side of the organization, on a **single platform**, through a digital chain, enables a huge amount of efficiency and disrupts the traditional way of doing business. This in turn reflects immediately at the bottom line of an organization.

By leveraging the **extended organization** concept, using portals and mobility, that are tightly integrated to the In4Suite® platform, the organization builds a completely connected internal and external organization architecture which allows the flow of information in real time.

Implementing In4Suite® leads to a complete digital transformation of the organization and releases a huge amount of efficiencies across all groups and departments in an organization.

In4Suite's award winning platform allows for a strong platform for **General contractors and sub-contractors** to work with their clients for billing and collections, and also at the same time work with their internal teams and sub-contractors to deliver work at hand. Contracts can accept tenders in, estimate and quote through the Contractor CRM and BOQ Estimation. This is then followed by Invoicing and collections management for their Revenue. At the same time, they can create the Budgets from the quoted BOQs and manage the execution of the project internally with their own labour or via sub-contracting.

In4Suite® Contracting Workflow

In4Suite® Esteemed Clients (500+)

As a fast growing company within the construction industry we wanted to digitize our operations and have a birds eye view of all the operational activities of the business and had been in the market for the past 2 years looking for a tailored solution for the construction industry because of the unique nature of it's operations. We came across In4Suite® after a lengthy research that was dedicated to real estate and construction industry only which made customising and adaptability very easy.

Mr. Bharat Kerai

Director at Ark Constructions Ltd

This software gives us opportunity to digitalize each and every step we encounter while doing our business and finally consolidating them into different MIS as well as Financial Accounting and Financial Analysis. In addition there are so many options where communications are recorded and physical records in digitalized form are to be stored. This software is of great help."

Mr. Jai Prakash G

CFO, Pyramid Infratech Pvt. Ltd.
